I called (714)288-3500 ext 380 and asked to speak with Sol, however spoke directly to GC, Katie and she clarified that father was explained of Exome testing and co-seg as the two girls having bilateral scull fractures and are living with a relative. Katie said that Parent's can be given Secondary Findings, however Results for the daughter's should NOT be released as they are in Foster care.

Rcvd VM cld #(909)665-0213 Ella Monga (Social Service Practitioners) regarding a child abuse investigation regarding the sister Athena's findings. Reached out to CA and confirmed that without an ROI from social services we can not technically confirm/or disclose info. Internal info (That Athena was not fully sequenced and that OP did not Order secondary findings for Athena). Referred Ella back to OP to discuss Athena. She said she will refax ROI and will contact OP.
